Badge Maker Instructions

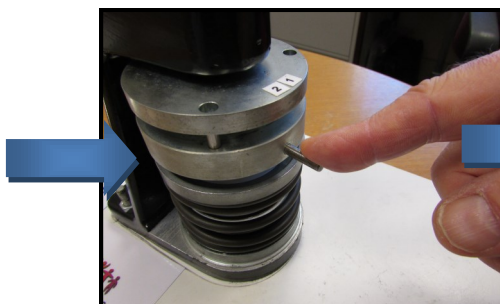

Step 1: Have your image on the circular template, with the cutting board underneath it. Place the cutter on the template over the circle as shown in image. Turn the handle all the way around the image. Now remove image.

Step 2: Take the die, labelled 1 (red), place the silver badge-back into it over the red side. Place your cut out image over the top of this. Put a clear cover over the top.

Step 3: Place the die under the badge maker. Move the small silver handle to position '1' as shown. Pull the top lever down firmly. Lift the die back out and turn over so that side 2 is showing (black side) and place white badge-back on top of it with pin that affixes to clothing facing down as shown. Put die back under machine and move small silver handle to position 2. Pull the lever down firmly to complete the badge. Remove the die from the badge-maker. Take out the completed badge. Store the machine with the lever down and the die removed.
